Behavioral Assessment:

Dog Name	Frank #5
ID NO:	26-245
Arrival Date:	10/14
Date Tested:	10/27
Tested By:	HH
Test Level: *(See level descriptions at the end of the test assessment.)*	**1**

Behavior Assessment is a standard practice of rescues and shelters to evaluate the personality and behavior of the dogs in the program. The purpose of the test is to gain an understanding of the dog's character. The test is performed a minimum of 3 to 5 days after the dog's arrival as some dogs may be stressed when they first arrive and testing during this time may not be an accurate assessment. Although all efforts are made with the end goal of making the best possible placement for both the dog and owner, it is impossible to guarantee the personality and behavior of any dog. The behavior assessment is not an express or implied warranty or guarantee of any kind of the dog's personality and behavior. We strongly advise that you monitor your dog closely and use caution/discretion as to with whom and under what circumstances interactions are allowed with your dog until you have fully acclimated the dog to its new surroundings and have formed your own observation and assessments of the dog's personality and behavior after acclimation to its new placement.

GENERAL BEHAVIOR:
These questions are designed to determine how the dog interacts with strangers and to get a feel for the dog's general demeanor.

Comments:

FOOD GUARDING:

Some dogs become protective of their food bowls or other food objects, and may growl or try to bite when approached. The first test indicates if the dog will react if an artificial hand is presented to the dog without food nearby. The second test determines the dogs' tolerance for being petted while eating, and having someone try to put hands in their bowl.

LEVEL SUMMARY DESCRIPTIONS:

Level 1:
Super easy, low energy, no issues; would do well in virtually any home regardless of owner experience.

Level 2:
Low to moderate energy though some activity may induce high energy. Needs average leadership; generally lacks obedience or house manners. Could be shy, quiet or outgoing but not difficult. Dog may have minor issues that are easy to address and is a good dog.

Level 3:
Moderate, high or very high energy/drive. Needs an owner experienced with leadership and proper management. Typically good dog but may have challenging behavior. Could be dog reactive or aggressive and possibly the only animal in a home.

Level 4:
Intense focus and/or extreme energy/drive. Could be a dog for fly ball, agility or other sporting abilities. Can be strong, pushy or dominant. Needs experienced owner that has commitment to provide the dog with the guidance and training he/she needs to be successful.

Level 5:
Extreme lack of social skills regarding humans; needs a canine mentor. Requires owner commitment and patience to allow dog to grow at its own pace and increase confidence.

ONGOING OBSERVATION:

POTTY HABITS
Dated Tested:

x	Routine, no problems noted
	Occasional accident in kennel, not a serious issue
	Frequent accidents, will likely need remedial house training post adoption

Comments:

NOTES:

Pete and Frank are a pair of wonderful boys.

They both walk very nicely on leash.
They like to play and wrestle with each other.
They love attention and petting.
They have some basic obedience skills.

Previous owner said they were having potty accidents in the house,
but we have not had any issues with this at all.

Pete is a little more playful and affectionate, and is a good eater.
Frank is slightly more serious but likes butt scratches and is a finicky eater.

Both are great dogs and nice companions.
